CHOOSE *YOUR* COLOUR

Love the look of our Elegance Collection, but would like to make it that bit more special and more personalised for you? Well why not give it a touch of colour. We have a vast range of stunning high performance classic and contemporary colours of UPVC to transform the entrance to your home, with the option of custom dual colour options available too.

If your thinking of transforming your Elegant Door with a splash of colour, whilst also adding to its perceived value, then here is what you need to know:

- **Coloured UPVC is becoming an increasingly popular trend in the housing market**
- **Our coloured UPVC is durable and resilient lasting up to 10 years or more.**
- **Our coloured UPVC doors are guaranteed to withstand all weather conditions**

Explore our colour options today, see how each colour can transform the door of your choice.

CHOOSE *YOUR* GLASS

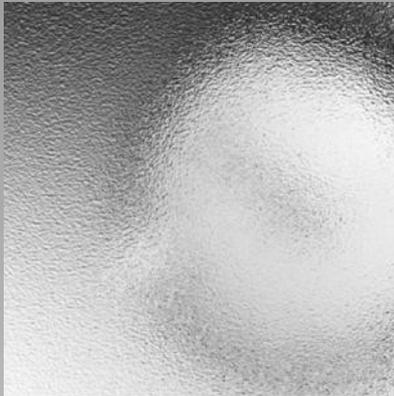

When it comes to your front door we know that privacy is essential. Not only this, the glass and privacy that you are hoping to get, must also be safe and secure. That's why all the glass within our doors come with reinforced toughened safety glass as standard. So, along side the protection that our doors offer, you can be sure that your glass is secure too! When it comes to choosing a privacy glass, within our doors, you have two options to provide the best level of privacy possible:

- *Obscure Stippolyte Glass*
- *Obscure Satin Glass*

Both options of backing privacy glass will provide you with that privacy you require, whilst still allowing light into your hall. At the same time, both options don't detract from the overall look and finish of the door; in some instances actually enhancing it. Both options are still guaranteed to transform the entrance to your home.

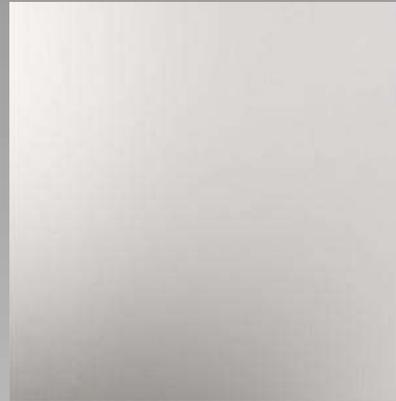

There is also the option to have any of our doors available in **clear glass** too.

Check out our privacy glass examples below:

HAWICK

The Hawick is an elegant twist on our customer favourite the Culloden. Featuring four sections of glass similar to the Culloden, however offset to create a curve resulting in a truly elegant contemporary upvc door, that can be flipped to curve both left and right to suit any opening for your home. The Hawick is also available in all colour options too and can feature stippolyte or satin glass.

STAINLESS STEEL AFTER CARE

AT PRIME PANELS WITH A LITTLE CARE AND ATTENTION OUR ELEGANT DESIGN WILL LOOK JUST AS GOOD AS IT DOES AT THE POINT OF INSTALL FOR YEARS TO COME.

- To ensure that you keep your stainless steel modern panel in prime condition we recommend that you have a routine of cleaning your stainless steel trim at least once every **4** weeks.
- When cleaning your modern panel, extra care must be taken when wiping over the surfaces. A clean cloth mixed with warm water and a mild detergent is more than enough to clean your stainless steel surface. A simple rinse of warm water on the stainless steel trim after using the detergent, finished with with a wipe of a dry towel on completion is all that is required.
- When it comes to more difficult dirt or stains, we strongly recommended that you use a mild, no scratching abrasive powder, such as your standard household cleaning products. These combined with bristle brushes, or simple sponges should remove those stubborn stains whilst maintaining the steel, without damaging it.
- Using any other brush or sponge other than what was recommended above like: steel brushes or steel wool, should be completely avoided! Using either of these will result in leaving scratches and particles on the stainless steel surfaces which could also lead to rusting and further damage to the surface.
